SUMMARY:

Full-stack software developer with expertise in crafting intuitive UIs with **React Native**, **Next.js** and building scalable APIs using **Express/Node.js**. Passionate about delivering high-quality end-user experiences and optimizing application performance and workflows.

EDUCATION:

- **Bachelors (CS) | FAST-NUCES**, Lahore (2021-2025)
- **FSC Pre Engineering | FCC**, Lahore (2019-2021)

TECHNICAL SKILLS:

- **Frontend** - React Native, Redux Toolkit, Expo, Nextjs, TypeScript, Git
- **Backend** - Node.js, Express.js, TypeScript
- **Database** - Firebase, MongoDB, MySQL

WORK EXPERIENCE:

Software Engineer - Ripeseed.io | Faisal Town, Lahore, Pakistan | August 2025 - Present

- Contributing as part of the team developing a full-scale production application for American Roofing Industry with a **Django** backend and **Next JS** frontend that delivers practical solutions for the roofing industry.
- Improved quoting workflow efficiency by 90% by connecting distributors, contractors, and customers.
- Reduced manual material estimation time from 3 days to <1 minute through in-house automated measurement tools.

Software Engineer - Tech Grus | Remote | Feb 2025 - August 2025

- As the sole developer, designed and engineered a robust, **secure backend** using Next.js and Firebase to manage **critical data** (orders, payments, user details) for two key restaurant clients.
- Developed and deployed dynamic, responsive Next.js frontend with **Redux Toolkit**, adaptable for both client brands and optimized as **Progressive Web Applications (PWAs)** for enhanced user experience.
- Increased retention via loyalty program and analytics dashboard integration, boosting repeat orders by **25%**.

React Native Intern - 724.One | Remote | September 2023 - January 2024

- Delivered 4+ production-ready features under strict sprint deadlines, contributing to two successful app releases.

PROJECTS:

Knowledge Quran - Frontend Development | Android | IOS

Tech Stack: React Native (Expo), TypeScript, WebRTC, Firebase, TailwindCSS, Jitsi SDK

- Mobile Learning Management Portal where students, teachers and admins can log in and then take/give classes, view marks, manage accounts and other tasks according to their role.
- Peer to Peer connection: Utilizing **WebRTC** technology and Firebase for online Video Conferencing.

FitKraft - Final Year Project | Frontend and Backend Development | Android

Tech Stack: React Native (Expo), TypeScript, NodeJS, ExpressJS, TailwindCSS, MongoDB

- Frontend developed using Expo and utilized **React Native Reanimated** to create modern components that respond according to user interaction. Backend Implemented using NodeJS and Express.
- A health app that calculates BMI and then uses AI to create personalized workout and meal plans.
